

GUIDE FOR EFFICIENT USE OF TO-DO APP

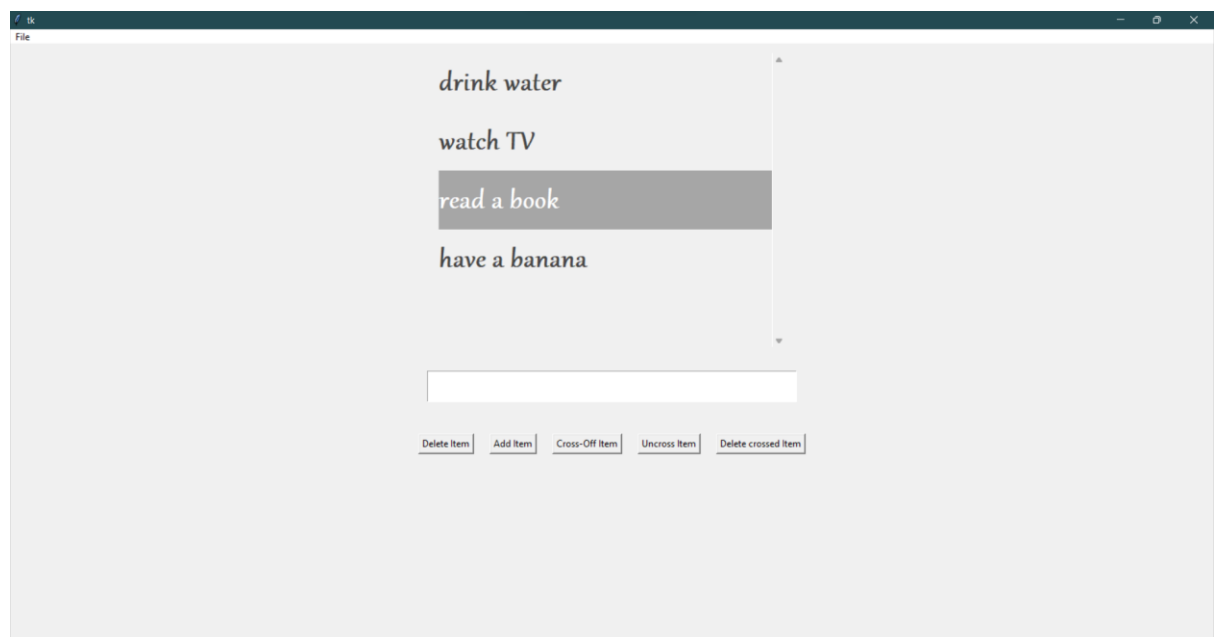

- When we run, initially, we find a window with some default items on the list. Click on the File option and select DELETE LIST to clear list and make your own.

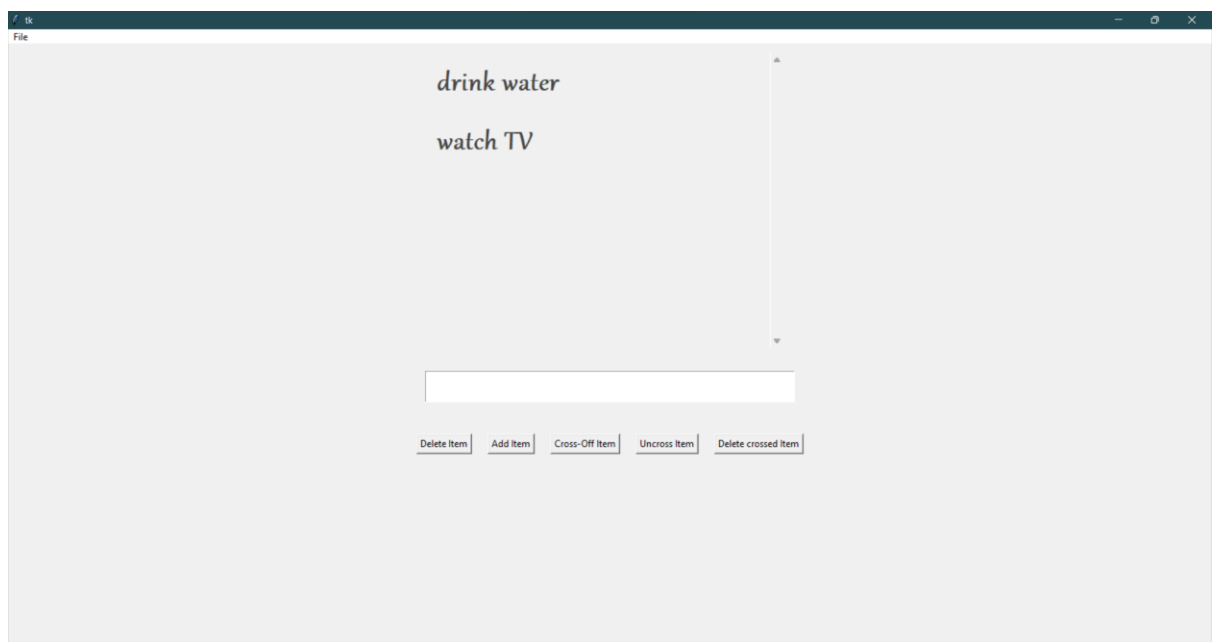

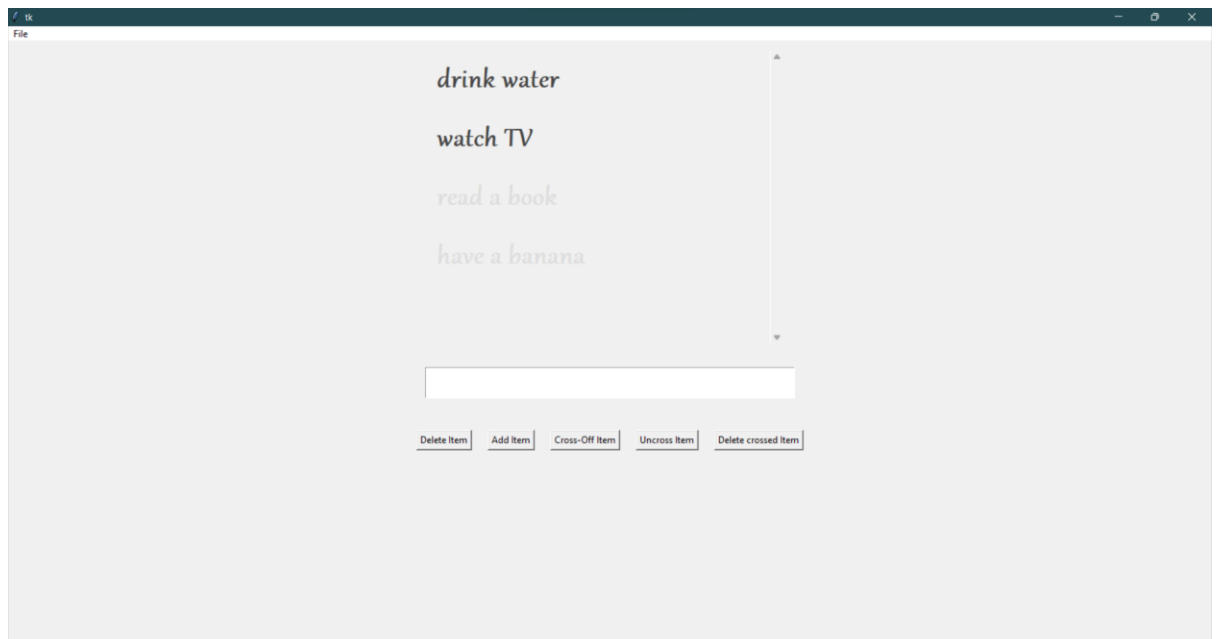

- We can then type in the text box and click on ADD ITEM to push it on the list.

- After finishing a task, you can select the task (as shown below) and click CROSS-OFF ITEM to fade it out of your list. Similar steps can be performed to UNCROSS ITEM or DELETE ITEM.

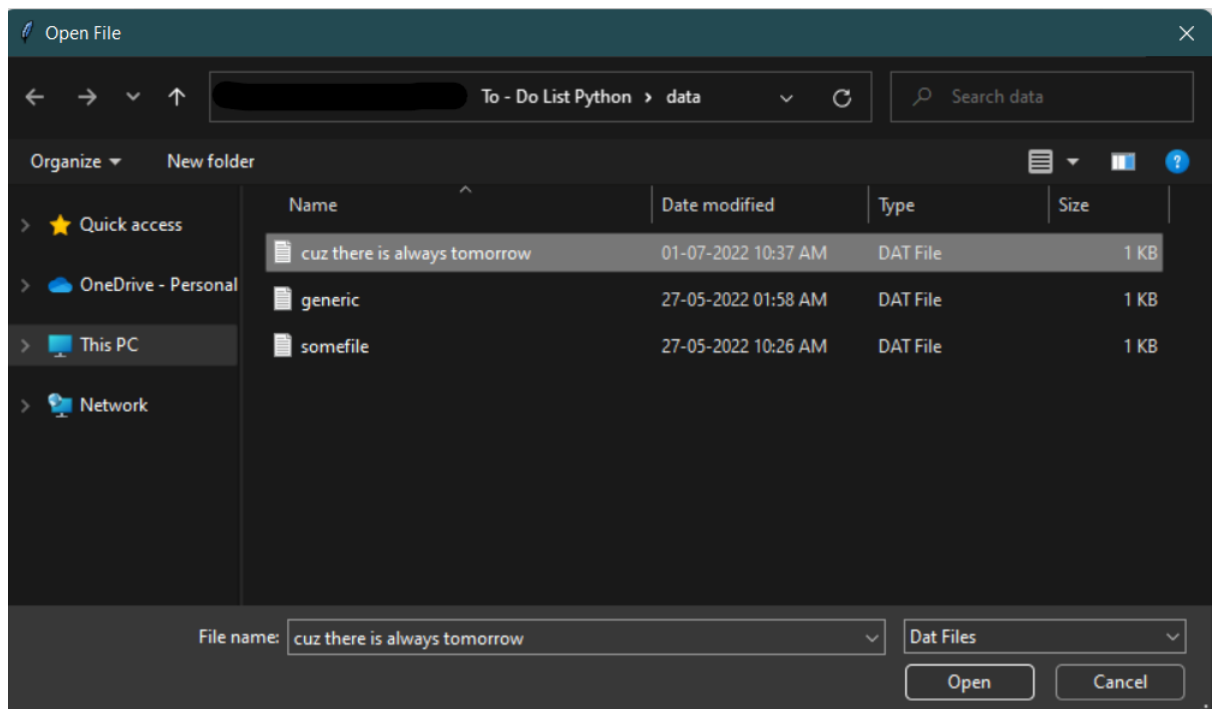

- Seem to get rid of the task you have finished completely from the list, click on DELETE CROSSED ITEM button to pop all tasks that you have finished.

- Feeling you can't finish the tasks today and want to continue tomorrow, don't worry, 'cuz it's got you covered!! Click on the File option on the top left of the screen and select SAVE LIST. You will be asked for the location of storage. Preferably store it in the folder provided in this repo. Give it a fancy name and save it.

- To open a previously saved list, go to the file option on the top left corner and click OPEN LIST. Go to the location where you saved and double click on it. You shall see it just as it was last day!!

THANKS FOR
STICKING AROUND

NOW YOU CAN USE
THE APP SMARTLY
THAN EVER
BEFORE... 😁
